Information we need from Aquamor

Prepared 14 November 2026

The website is almost ready. To finish it and put it live, we need you to confirm the items below. We only publish prices and facts that you have confirmed — that way a customer never sees a price or a claim that is out of date.

You can answer in one WhatsApp message, in a voice note, or by sending a photo of your price list. Please answer by the number next to each question so nothing is missed.

---

1. Prices

1. The **Ksh 500–800** you mentioned — is that **per bottle** or **per pack/carton**?
2. Does that range cover **small bottled water** or the **branded bottles** (bottles with your label)?
3. If it is small bottled water, what is the price for each size: **300ml, 500ml, 1L, 1.5L** (and 5L if you sell it)?
4. For **branded bottles**, what is the **minimum order**?
5. How much do you charge for **dispenser cleaning**?

2. Delivery

6. Which areas do you deliver to **free**?
7. Is there a **minimum order** to get free delivery?

3. Business details

8. What is the **official business name and tagline**? We have seen more than one version and want to use the correct one everywhere.
9. Do you want the **water purification steps** shown on the website? If yes, please list them.

4. Quick confirmations

10. Is your **Facebook page a business page** (not a personal profile)?
11. Which **bottle sizes do you actually sell**? The flyer shows 500ml, 5L, 10L and 20L, but your message also mentions 300ml, 1L and 1.5L.
12. The **regular 20L bottle at Ksh 450** — does that price include the water?

3. Do you **sell the water pumps**, or are they only for use with your dispensers?

5. Website address (domain)

4. What **website address** do you want? We suggest **`aquamor.co.ke`**. If it is taken, `aquamor.ke` or `aquamorwater.co.ke` are good alternatives.
5. Should the domain be **registered in the business name**, and **who will pay the yearly fee**? It costs about **Ksh 1,200–1,500 per year**; this is paid to the domain registrar, not to us.
6. Do you **already own a domain or use email on one**? Please tell us before we change anything, so your email does not stop working.

We recommend the domain is registered in **Aquamor's name**, with Aquamor paying the renewal. We will keep the technical settings (the "DNS") so the website stays online, but the domain itself belongs to the business.

6. Photos (optional)

We can add these if you have them. Please send the original photo files, not screenshots:

- the shop front on Musindi Road, taken from the street;
- graduation or corporate event photos;
- a close-up of a glass bottle with its label;
- original before/after photos for the cleaning service (the current ones are small crops from a flyer).

7. Online payments

Online payment is built but switched off. To switch it on, we need:

- an **approved Flutterwave business account** that can receive Kenyan shillings;
- the account's **secret key** and **webhook secret** (these are private — send them to the person who maintains the site directly, never in a group chat);
- confirmation of the **bank/M-Pesa account where payments should settle**, and **who handles refunds**.

Until these are supplied, customers order through WhatsApp as they do now. Nothing breaks.

8. Swahili check

The site is in English and Swahili. Before launch, one native Swahili speaker from your team should read it once and tell us if any wording sounds unnatural.

What we will not publish until you confirm

Item	Waiting for
Ksh 500–800 price	Per bottle or per pack, and which product
Small bottled-water prices	The price for each size
Branded-bottle price and minimum order	Confirmation of both
Dispenser-cleaning price	The price
Free-delivery areas and minimum order	The areas and the minimum
Any KEBS number or certification claim	Your own certificate (the current one is your supplier's)
"Water included" for the 20L bottle at Ksh 450	Your confirmation
Water pumps for sale	Your confirmation
Online payment	A Flutterwave business account and its keys

How to reply

You can copy this and fill it in:

```
Aquamor website — information

1. Ksh 500–800 is per:
2. That price covers:
3. Small bottled water prices:
   300ml:        500ml:
